

# 2018 NEAMC Award Winners

We are pleased to announce the 2018 NEAMC (North East Asian Mathematics Competition) Awards.

NEAMC started in 2014 as a sister event to the South East Asian Mathematics Competition (SEAMC) which has been running since 2001. NEAMC 2018 brought together 183 students from 19 schools across Asia.

Students work individually, in school teams and teams composed of members from different countries on 9 different activities that require them to think mathematically, strategically and creatively. Individual awards are given in 6 categories as well as the all-around winners. The categories are Communication, Collaboration, Challenge, Strategy, Knowledge and Creativity.

7 students from Seoul International School are qualified for the World Math Championships in Melbourne 2018.
